 **AccuWeather**

by TELEMET

Telemet, Inc. has been providing state-of-the-art AccuWeather® products and services to the international market since 1987.

Together we are the only fully integrated weather company serving all media, all type of companies including more than half of the Fortune 500 and thousand of others, highlighting government agencies worldwide.

Keep your operations safe and
productive with our
AccuWeather® weather services

we provide reliable services with vast
experience and first class professionals.

Our services are customized according to the size and needs of your company

SkyGuard®

Protect your people and production with 24/7 severe weather alerts and advice from our expert meteorologists.

Weather Forecast

Understand the expected impact of weather events on your business operations.

Data & Analytics

Use current and past weather data to maximize weather-driven business and action opportunities.

Maximization of Renewable Energy Plants

Thanks to our solar data you will be able to enhance and maximize your renewable energy operations.

SkyGuard®

Severe Weather Alerts

Our 24/7 Weather Alert System and the one-on-one consultation with our meteorologists will allow you to keep your operations efficient and cost-effective.

The SkyGuard® system automatically and simultaneously disseminates warnings to all your team in real time.

Act quickly in the wake of severe weather events

Use our weather intelligence to deploy teams and initiate emergency procedures to protect people and property on the ground.

Weather Forecast

Severe weather is forecast, indicating the time to begin safety preparations.

Tailored Alerts

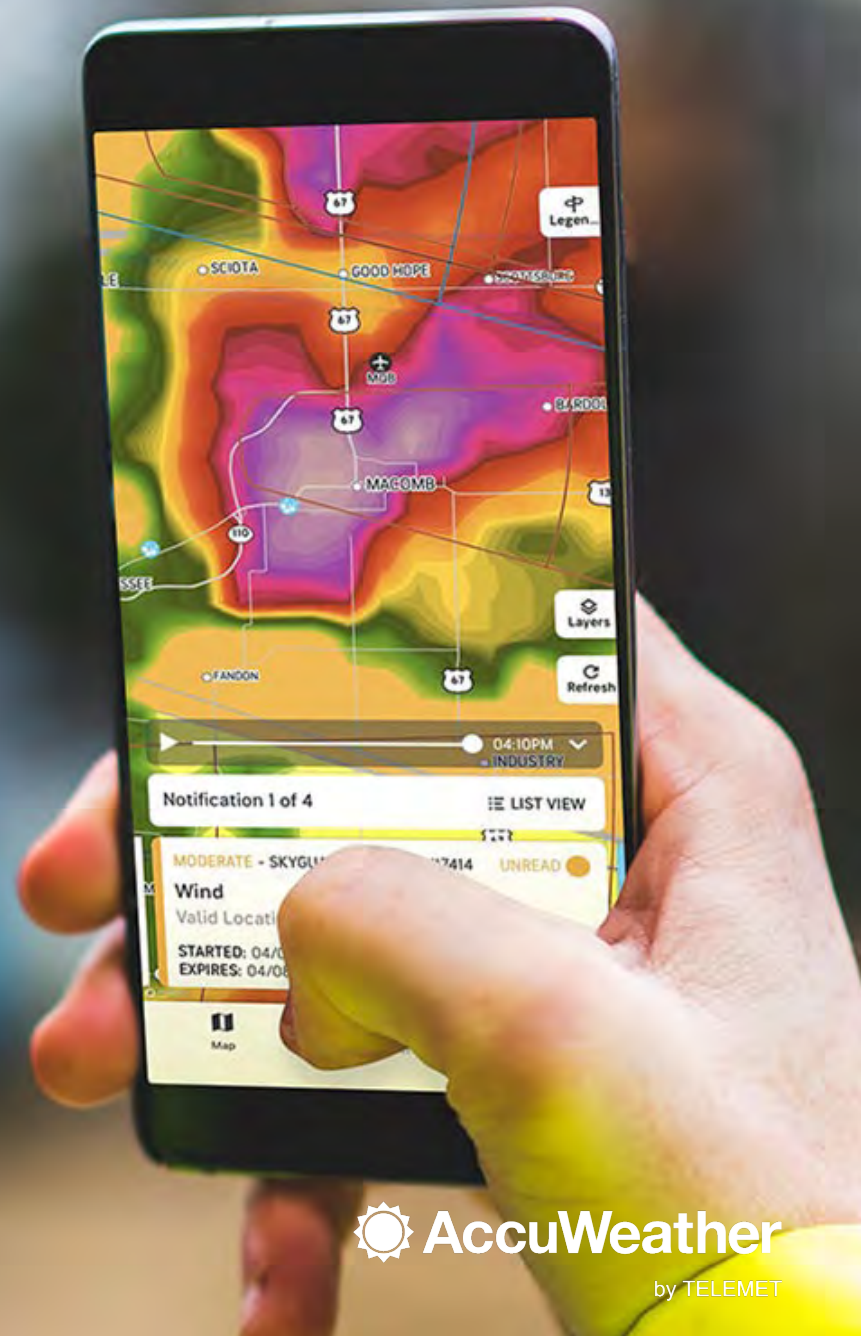

Meteorologists customize SkyGuard® alerts as soon as the threat of severe weather is detected.

Automatic Delivery

The weather alerts are sent to key decision makers via email, SMS and push notifications.

Confirmation

Meteorologists proactively monitor safety confirmations and follow up if no warning receipt is acknowledge.

Forecast

Plan outdoor work schedules
without wasting time

Use weather forecasts to organize works,
prepare operational assets and predict
disruptions in your supply chain.

Analytic

Avoid false alarms and costly shutdowns

We provide null warnings for severe weather that is in the area but will not impact your site location.

Renewable Energy

Power up your renewable energy installations with solar forecast data

We provide solutions to traditional and renewable energy power plants with solar radiation and photovoltaic power forecasts, grid aggregations and advanced forecasts.
