

Diamond Edge

Snow plough

The Meyer® Diamond Edge™ is a professional-grade plow designed for snow removal contractors tackling large parking lots and streets. Compatible with ¾-ton pickup trucks and larger vehicles, the Diamond Edge is available in lengths of 8 and 9 feet. Its robust construction, easy-to-use operating system, and unmatched ground clearance make it the ideal choice for your snow removal needs.

Highlights

- **Available in 8’ and 9’ lengths** to accommodate a variety of applications.
- The **cutting edge can be both flipped or rotated**.
- Pre-drilled holes for **easy snow deflector installation**.
- Nite Saber LED lights provide **high visibility for safe nighttime operations**.
- **Pistol-grip controller** for easy blade adjustment, right from the driver’s seat.

Your benefits

- **Effective**: Taller moldboard and aggressive attack angle clear snow fast.
- **Durable**: Reversible cutting edge extends plow life.
- **Efficient**: Bottom-trip design minimizes load loss and maintains plow control for the driver.
- **Peace of Mind**: safeguarded by our industry-leading 5-year warranty coverage.

Performance features

Plow blade

The Diamond Edge moldboard boasts an aggressive 70-degree attack angle that swiftly clears snow and enable superior back-dragging. The bottom-trip design maintains blade uprightness to ensure minimal load loss by allowing only the lower portion of the blade to give way.
Crafted with a robust tubular steel A-frame and pivot bar, the plow ensures strength at crucial pressure points. Continuously welded outside ribs bolster blade durability, while slot-and-tab construction ensures precise fitting. Pre-drilled holes facilitate easy attachment of an optional snow deflector, and the powder-coated finish featuring Meyer Dura-Slick™ paint and Teflon® guarantees smooth snow rolling action.

Mounting system

The Diamond Edge series comes in two mounting systems, EZ Plus and Pro Mount:

- The **EZ Plus** allows for adjustable drop speed thanks to its encased power unit. The pistol grip controller offers hands-free plowing, diagnostics, and double-click technology, enabling moldboard adjustment without continuous button pressing. Standard Nite Saber® LED lights enhance visibility for efficient nighttime operations.
- The **Meyer Pro Mount** attachment system was designed to be easy to use. In fact, the **hydraulic switch simplifies attaching and detaching the blade**, requiring less precise alignment between the plow and the truck.
  The spring tension release latches allow quick and easy mounting or dismounting of the blade from Meyer's renowned truck mount and clevis, all from the side of the plow.
  The Pro Mount eliminates the need for lifting chains, which reduces the need for replacement parts, and industry-standard power components feature automotive-style connectors for increased reliability.
  The Pro Mount boasts a solid cylinder that stays rigid during use, minimizing the bouncing that can damage both the plow and the truck, and ensures the appropriate downward pressure for superior plowing and back-dragging capabilities.
