PB **100** ParkPro

The compact Parkpro

On Top of the Mountain since 1969.

PistenBully®

For more Fun in the Park

Agile, compact and versatile

THE PARK PROFESSIONAL FOR SMALL FUN AND FAMILY PARKS
With the PistenBully 100 ParkPro, PistenBully offers the ideal park machine for smaller snow parks such as fun or family parks, which make every ski resort more attractive.

It is based on the proven PistenBully 100, the most powerful snow groomer in its class. The legendary PB 100 has been optimized in collaboration with customers from all over the world. The result: ideal torque, the most environmentally friendly exhaust technology and other innovative new developments. With its superior engine performance, it ensures perfect slopes in alpine use – and now also perfect parks in the park version.

The popular ProFlexTiller known from the PB 400 ParkPro is now also available in a 3.2 meter width as a ParkFlexTiller for the PB 100 ParkPro. Thanks to its extreme flex angle and V/A position, it enables optimum work in the park. The ParkBlade with SideCutters and the proven ProMount system ensure maximum freedom of movement and unrestricted creativity in park construction.

More information
Discover the new PistenBully **100** ParkPro from Kässbohrer Geländefahrzeug AG

STANDARDIZED OPERATING CONCEPT
Controls arranged in the same way across all models, double-jointed joystick, four individual driver settings.

NODECK
Optimum view of tracks and tiller.

ParkFlexTiller
+/- 14° Flex angle, V/A position and freeze function for optimum adaptation to terrain and perfect results.

CHASSIS AND TRACKS
Best climbing ability even on kickers thanks to 4 running axles and all-purpose 5-belt combination tracks.

POWERFUL AND CLEAN ENGINE
6.7 L Cummins 6-cylinder engine with 256 metric HP / 1,152 Nm. Tier 4f and EU Stage V emissions standard.

ProMount CHANGE SYSTEM
Optimum kinematics for even larger movement radii in park construction.

ParkBlade
Wide blade across the entire tiller width, with backblade cutting edge, folding side cutters and OneTouchStraight function.

ParkBlade

More efficient than ever before

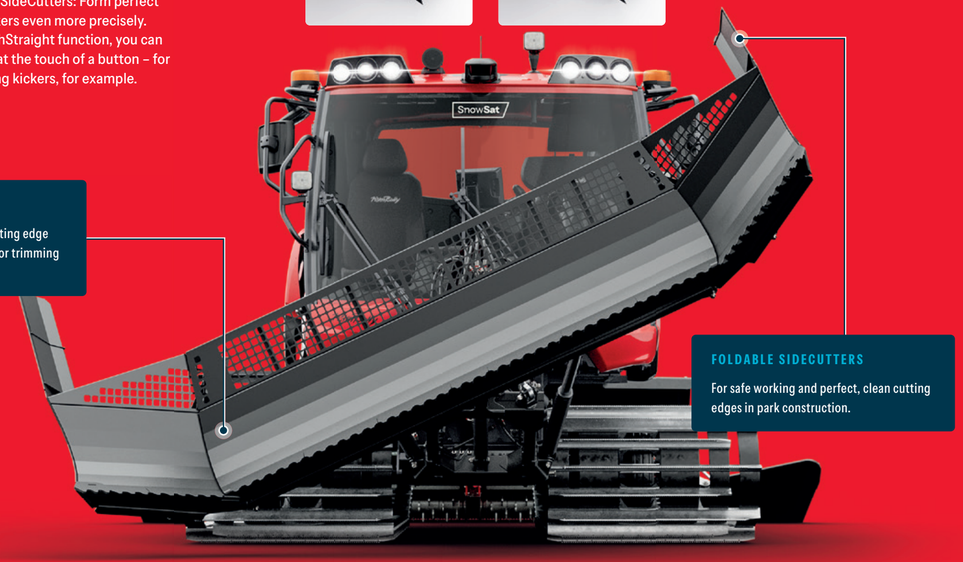

THE PARKBLADE MAKES EVERYTHING EVEN SHARPER
Wide park blade with folding SideCutters: Form perfect cutting edges and shape kickers even more precisely. With the innovative OneTouchStraight function, you can quickly straighten the blade at the touch of a button – for cleanly pulling off and shaping kickers, for example.

ONETOUCHSTRAIGHT FUNCTION

With the OneTouchStraight function, you can automatically straighten the blade at the touch of a button thanks to the rotary angle sensors – perfect for shaping kickers quickly and precisely.

BACKBLADING PROFILE

Wide blade with backblade cutting edge across the entire tiller width. For trimming kickers cleanly.

FOLDABLE SIDECUTTERS

For safe working and perfect, clean cutting edges in park construction.

ProMount

Flexibility redefined

LARGER MOVEMENT RADII IN PARK CONSTRUCTION
Thanks to powerful cylinders and the high-performance, proportional hydraulics of the ProMount change system, the PB 100 ParkPro handles all park construction requirements precisely, quickly and powerfully. The optimized kinematics allow even larger movement radii in park construction and greater flexibility of the attachments.
All implements can be operated simultaneously. Perfect for the skillful shaping and reshaping of kickers, ramps and jumps.

ProMount CHANGE SYSTEM

Optimum kinematics for even larger movement radii in park construction.

PB **100** ParkPro

ParkFlexTiller

V POSITION

A POSITION

For perfect surfaces

FOR MAXIMUM FLEXIBILITY IN THE PARK

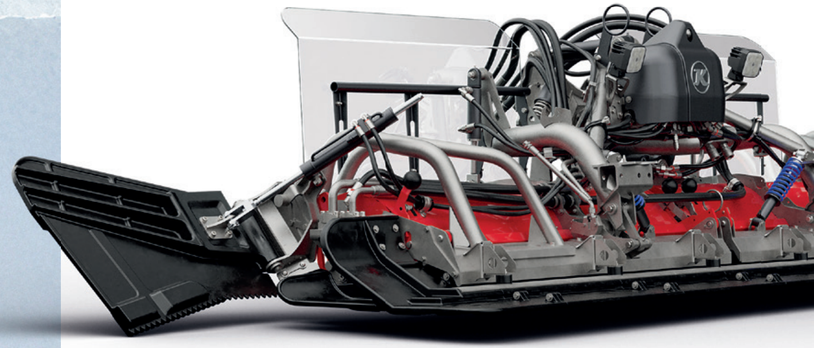

The new ParkFlexTiller enables optimum adaptation to the slope conditions thanks to the V/A position.

In addition to actively approaching every end and intermediate position, you can accommodate every slope contour in a floating position and fix it in place with the freeze function.

EXTRA POINTS FOR PERFECT PARKS

- Freeze function: can be locked in any position
- All positions hydraulically approachable
- +/- 14° Flex angles for maximum V / A positions
- LED headlights on the tiller
- Camera on the tiller
- Hydraulically folding side finishers

PistenBully®

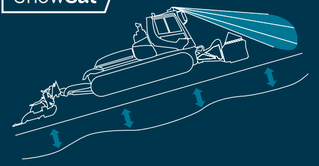

Assistance systems

For precision also on the slope

BETTER RESULTS AUTOMATICALLY
The unique, innovative assistance systems from Kässbohrer support you as an operator in your daily work. Of course, they cannot replace your experience and your trained eye. But they make a lot of work easier and help you to complete tasks even more efficiently and precisely.

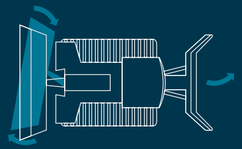

SnowSat

KNOWING WHERE THE SNOW IS

Our precise snow depth measurement supports you in identifying areas with little snow and snow reserves. With SnowSat LiDAR even under, in front of and next to the vehicle, for efficient work and the highest quality in slope construction.

AutoTracer

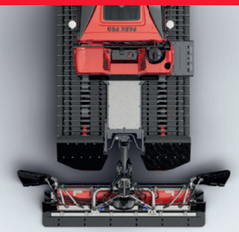

MAXIMUM TRACK STABILITY

Automatic steering when cornering, automatic position compensation on side slopes: The rear implement carrier with active steering assistance takes the strain off you and guarantees maximum directional stability and maneuverability in all conditions.

Variants

THE RIGHT THING FOR EVERYONE
You have the choice between two deck versions. The FullDeck version is available as an option.

NODECK
Optimal view of tracks and tiller

FULLDECK
Large storage and transport area

Welcome to the Cockpit

HALF STEERING WHEEL

Optional for the standard stick control: the horizontally infinitely adjustable half steering wheel.

STICK CONTROL

In park construction, the stick control on each side supports precise handling and steering. You can control the speed with the power potentiometer.

EVERYTHING IN VIEW, EVERYTHING UNDER CONTROL
The uniform operating concept of all PistenBully models is also found in the PB 100 ParkPro. A double-jointed joystick supports intuitive but also customized control. The function buttons on the armrest and joystick can be freely assigned – 3 customizable ParkPro profiles can be saved. The large windows, the perfect arrangement of all controls and ideal lighting ensure a clear overview and efficient working.
The automatic heating and climate control system creates a pleasant room atmosphere. Storage options and cup holders increase comfort.

PistenBully®

The full range

BECAUSE THE MOST IMPORTANT FEATURES ARE ALREADY INCLUDED AS STANDARD
Whether stick control, NoDeck version or sound package – the PistenBully 100 ParkPro is configured from the outset as a professional tool for the park. We will be happy to advise you on the right equipment for your requirements.

Standard features

- ⊕ Increased degrees of freedom on the blade and adapted kinematics
- ⊕ ParkFlexTiller with +/-14° flex angle incl. active control
- ⊕ Park blade with backblading profile and OneTouchStraight function
- ⊕ Comfort seat
- ⊕ Stick control
- ⊕ NoDeck version
- ⊕ LED lighting package + LED headlights
- ⊕ AutoTracer
- ⊕ Rear camera
- ⊕ Vibration damping on the rear implement carrier

Optional

- → Steering wheel
- → FullDeck version
- → Radio with Apple CarPlay / Android Auto™ incl. improved hands-free system
- → VarioTrackDesigner preparation
- → Comfort air conditioning system
- → Front hydraulics / front high pressure
- → hydraulic oil preheating
- → Central locking
- → Side damping on implement carrier, electrically adjustable
- → Parking heater

Sustainable slope management

SUSTAINABLE, OPEN TO TECHNOLOGY, INNOVATIVE
Today, Kässbohrer is the leading full-service provider for sustainable slope management: From alternative drive concepts for our PistenBully and digital solutions with SnowSat to efficiency-enhancing training and courses in our ProAcademy, we offer you a unique package of intelligently networked products, services and processes.

PistenBully®

Our PistenBully snow groomers have been in successful use around the world for decades, ensuring perfect parks and slopes with high performance and efficiency. PistenBully is also the pioneer of the first diesel-electric snow groomer and the first all-electric PistenBully. In addition, all of our diesel-powered vehicles can be refueled with HVO fuel, which reduces CO2 emissions by up to 90%.

SnowSat

RESOURCE-SAVING SNOW MANAGEMENT

With precise fleet and snow depth data, our SnowSat systems have been supporting ski resorts around the world for many years with time and cost-saving park and slope construction and maintenance, as well as efficient fleet and ski resort management.

ProAcademy

TRAINING FOR WORKSHOP PERSONNEL AND OPERATORS

State-of-the-art systems offer great efficiency benefits – provided that everyone knows how to use them. From operator training to technical training and SnowSat courses, our ProAcademy offers everything to make you faster, better and more efficient.

K-Service

365/24 SERVICE AND SPARE PARTS

You can only work efficiently and sustainably if you do work. Avoiding breakdowns and providing fast and professional support in the event of problems: that is the aim of our efficient global service network, which not only provides assistance in Antarctica, but also directly at your premises. Fast, competent, uncomplicated.
