CONTRACT MANUFACTURING

# CONTRACT MANUFACTURING THAT CAN DELIVER WHEN YOU DEMAND.

## From engineering to final assembly, we can get your job done.

With over four decades of heavy vehicle building success behind us, Builtmore Contract Manufacturing has the state-of-the-art facilities, highly trained personnel and proven lean process to become an extension of your production machine. All without the enormous time and financial burdens of gearing up to build your own facility.

Back office to plant floor, we're ready, willing and more than able to help you fill orders, allowing you to buffer the ups and downs of a demanding and often unpredictable marketplace. We're the manufacturing facility you can open with a call.

## On time. On budget. On demand.

Our cost structure, resource management capabilities, and flexible manufacturing model enable us to produce effectively at volumes that are modest compared to mass-market manufacturers and assemblers.

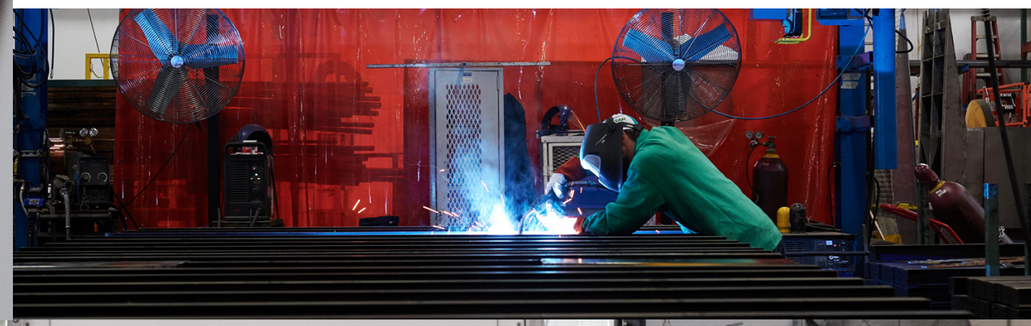

We move with the agility, innate vehicle knowledge, and expertise to deliver to your exacting standards, on time, and within budget. All with the freedom and flexibility you need to grow and shrink with less risk, and more reward.

## Continuous Improvement

Status quo is not an option at Builtmore. We are constantly working to improve our toolbox, processes, systems, and training regimens to increase productivity, efficiencies, and the quality of our output. This dedication to continuous improvement is second-to-none when compared to other contract manufacturers.

## Lean Manufacturing

Builtmore embodies lean manufacturing protocols from the office to the shop floor. We leverage this commitment to ensure our customers' projects–from build to final inspection–are efficient, repeatable, and leaves waste where it belongs–at the door.

## Commercial vehicle assembly:

We've been building big rigs for over four decades. As a result, we know our way around your vehicles from the chassis up. Our cost structure, resource management capabilities, and flexible manufacturing model allow you to produce effectively at volumes that are modest compared to mass-market manufacturers and assemblers.

## Defense vehicle assembly:

Since 2005, Builtmore has worked with America's leading defense contractors to provide automotive integration, final assembly, inspection, and shipment of more than 30 variants of vehicles under the Mine-Resistant Ambush Protected and International Light Armored Vehicle Programs. We're proud to play a role in keeping our service members and citizens safe.

## The X Factor for the Isuzu F-Series.

Isuzu North America partnered with Builtmore to help increase production of their popular F-Series Gas Trucks. With their specifications and our expertise, we worked together to design a new plant layout, planned and managed construction, defined lean workflow/cells, and managed pilot production builds.

In less than one year, we launched the facility and streamlined production stations by 73%, resulting in an astounding flexed production volume of 3x, with no loss of build quality. Today, Isuzu continues to lean on Builtmore as a partner in their ongoing heavy vehicle success.
