

SKR

Vehicle attachment

The innovative gully cleaner from Allroundmaster combined with the proven Schmidt Swingo 200+ or the Schmidt Cleango 500 is the perfect solution when it comes to cleaning gullies. By using the system, the work can be carried out by just one operator, making efficient use of both time and resources. Thanks to the improved workflows, the daily number of cleaned gullies can also be increased significantly.

Highlights

- **High daily output**
- **No physical strain** for the driver
- Operation is purely from the driver‘s cab
- **Ergonomically shaped handle** and armrest for fatigue-free work, armrest individually adjustable in all directions, **all controls accessible with one hand** on the joystick

Your benefits

- **Low wear and maintenance costs** thanks to lubricant-free sliding system
- High suction power even at low speeds, allowing **low-noise operation** and guaranteeing perfect cleaning results at the same time
- **Resource-saving**, as only one worker is needed for the cleaning process
- **High flexibility** thanks to the possibility of alternating operation between the gully cleaner and the sweeper

Performance features

Workplace

From the driver's gullies are cleaned using a flushing and suction tube which is telescopic. Leaves, sand, gravel and other kinds of dirt are sucked up through the suction tube and collected in the machine's hopper. **The driver is not exposed to the weather conditions and does not have to perform any heavy lifting.** The electrohydraulic operation and the entirely mechanised cleaning process guarantees rapid and efficient cleaning and a high level of daily coverage.
With a top speed of 50 km/h, the versatile carrier vehicle can operate over a large range. The delicately balanced, infinitely variable drive enables precise and easy working. Inside the driver's cab, a height-adjustable and articulating steering column including a tilt function ensures a comfortable position – even for larger drivers. Ergonomically designed operating controls and a fully air-conditioned cabin guarantee a relaxed working environment. The driver controls operations manually using a joystick.

Modular attachment

The SKR can be attached to both the Swingo 200+ and the Cleango 500 due to its modular design.
The **Swingo 200+ SKR** reabsorbs the rinse water used in the cleaning process, frees it from contamination and can thus be used again. Accordingly, no water needs to be refilled, even during longer periods of use.

The **Cleango 500 SKR** has a fresh water volume of 685 l and thus enables long working hours. Optionally, the water volume can be expanded via additional tanks.

Technical data

Dimensions	
Width	1,972 mm
Length	1,091 mm
Weights	
Weight (incl. base tyres; without attachment)	650 kg
Suction unit	
Suction tube diameter	160 mm
Lateral telescoping	700 mm
Max. standard suction depth	1,200 mm
Max. optional suction depth	2,000 mm
