BEACH TECH SWEEPY

The multifunctional sand and beach cleaner

BeachTech®

IDEAL FOR SMALL TO MEDIUM-SIZED SURFACES

BeachTech offers solutions for efficient and thorough beach cleaning. Even when not on the beach, our screening machines can remove nuisance and dangerous objects from the soil.

BEACHTECH SWEEPY HYDRO

Hydrostatic drive

The hydrostatic concept makes it especially easy for the operator to use. You'll appreciate the excellent maneuverability provided by the turnaround active steering system, particularly when working in tight spaces between beach chairs or on other sand surfaces, such as play-grounds.

Application areas

- Beach lounging areas
- Volleyball courts
- Playgrounds
- Sporting grounds

BEACHTECH SWEEPY

with mechanical drive

The BeachTech Sweepy has a mechanical drive and 3-gear gear box that makes it easy to operate. The built-in freewheel clutch means the Sweepy is extremely maneuverable and is easy to turn.

SMALL AND NIMBLE, BUT HIGHLY EFFECTIVE

The BeachTech Sweepy reliably and easily cleans and levels not only sand surfaces such as volleyball courts and playing areas, but also small sections of beaches.

Ready to REMOVE

Our Sweepy beach cleaner models remove the smallest pieces of litter such as cigarette butts, broken glass and metal parts as well as plants growing in the sand. What remains is always a clean and safe sand surface. Aeration of the sand reduces bacterial density, and the Kässbohrer technology ensures that the sand is completely preserved.

Organic material such as leaves, wood and vegetation

Dangerous objects such as broken glass, syringes and cigarette butts.

Trash and plastic

Stones

BEACHTECH SWEEPY – RUGGED, EASY AND EFFICIENT

The BeachTech Sweepy is impressively easy to operate, highly efficient and thorough in its cleaning of sand surfaces. It is suitable for a variety of uses throughout the whole year and furthermore saves time and money.

Handlebars
The handle bar inclination can be adjusted to body height without tools.

Vibrating screen
The double vibrating screen minimizes vibrations and even cleans wet sand effectively.

Waste container
The large waste container can be emptied and cleaned quickly.

Rugged and durable
The Sweepy has a sturdy design, corrosion protection provided by cathodic dip coating and parts made of glass reinforced plastics, which make it a low-maintenance and low-wear machine.

BEACH TECH SWEEPY HYDRO

BEACH TECH SWEEPY MECHANICAL

	BEACH TECH SWEEPY HYDRO	BEACH TECH SWEEPY MECHANICAL
Maneuverability	The turnaround active steering system turns the Sweepy 180° on the spot, directly over the center point (zero turn). The wheels rotate in opposite directions, and you have full control of the power during the turning process. Since minimal exertion of force is required, it is gentle on the soil and enables the equipment to be turned conveniently.	The built-in freewheel clutch and a differential make the Sweepy extremely maneuverable and easy to turn.
Speed	The operator controls the speed using a twist grip (forward and backward) with infinite variability.	The driver regulates the driving and working speeds using 3 forward and 3 reverse gears.
Multifunction indicator	 The multifunction indicator has a tachometer and displays operating hours, lubrication and oil change intervals, as well as the PTO shaft speed.	

Attributes

- Working width 1,050 mm
- Area coverage up to 4,200 m^2/h
- Waste container volume 44 l
- Cleaning depth up to 12 cm

MULTIFUNCTIONAL IN EVERY SEASON

The BeachTech Sweepy is a real multi-talent. Since it is equipped with a modular quick-change system, in just a few easy steps you can turn the sand cleaner into a snow remover, lawn mower, leaf vacuum, street sweeper and many other devices. With its tremendous versatility, the BeachTech Sweepy can be used throughout the whole year, making it a particularly economical and efficient solution for your company.

APPLICATION AREAS FOR MOWING, MULCHING AND SOIL TILLING

Rotary mower
Rotary mower with solid rubber guide wheels, rear discharge, blade carrier with replaceable fly cutters.

Cutter bar
The mower drive and cutter bar are available in different versions.

Rotary tiller
Robust professional rotary tiller with center and cross cutting blade made of sturdy, spiral-shaped cutting blades. Working depth adjustable without tools.

Flail mower
The flail mower is ideal for mulching grass and undergrowth.

APPLICATION AREAS FOR CLEANING AND GREEN AREA MAINTENANCE

Street sweeper
The street sweeper comes with a mixed brush set for dirt and snow. Option: waste container.

Weed remover
The weed remover is for environmentally friendly extraction of weeds from paved surfaces, perfect for vegetation in narrow spots and edges.

Leaf and waste vacuum cleaner
The leaf and waste vacuum cleaner has two height-adjustable running wheels. Includes a catch bag with a volume of 280 L.

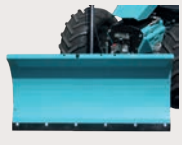

Garden pump and weed sprayer
The garden pump and weed sprayer has two swivel wheels, a 120 L tank and a spray gun with a 10 m rubber hose.

APPLICATION AREAS FOR WINTER SERVICE

Snowblower
Two-stage snowblower attachment. Hard-packed snow version, open on the side, with overload safety device. Discharge chute and flap with option to adjust electrically or mechanically.

Snowplow
Snowplow with replaceable steel scraper bar and rubber strip. Hand lever pivots from the handlebar.

Sand, salt, grit and fertilizer spreader
Spreading disc for the front-mounted attachment with adjustable spreading width.

OTHER APPLICATION AREAS

Garden shredder
Garden shredder with large filling hopper. Blades with 4 or 6 hammer flails, drive belts and belt pulleys to the flywheel.

Front transport trough
Modular transport trough for front mounting with 140 L and 170 L capacity. Easy-to-operate tilting device. Two large pneumatic tires provide stability and smooth running.

Path maintenance machine
For environmentally friendly removal of wild vegetation on water-bound paths and areas.

Further attachments available on request.
