Automatic Snow Chains

The new Onspot chain wheel

www.onspot.com

Just press the button
Automatic snow chains are engaged and disengaged just by pressing a button. You don't even have to leave the cab.

Easy to install
You get a complete Onspot kit delivered. Using your standard tools, it is easily mounted in a few hours.

Uncomplicated and well-tried
Ingeniously simple and reliable. With a sturdy design that withstands heavy wear, Onspot is installed on more than 150,000 vehicles.

Fits any vehicle
The customised brackets are available for most vehicle brands and models.

The exchangeable rubber ring

When the rubber of the wheel is getting worn, you are now able to replace it with a new spare part.

"A complete redesign of the chain wheel has made this possible!"

Now the complete wheel is constructed out of three parts. One top aluminum plate, one rubber ring and one bottom aluminum plate. The aluminum plates have grooves which correspond to the tags on the rubber ring. The rubber ring's tags fit into the grooves of the plates fitting the parts together like a glove. The bolts and nuts are then tightened securing the rubber ring in place with the pressure from the top and bottom plates keeping the ring safely and securely fixed.

Initially, this new design with the new features will be available in the 190mm wheels. The new chain wheels will be available in all of the chain options - 6, 12, 18 chains and also the spark resistant 6 chain option.

Satisfaction is guaranteed
Onspot comes with a 2-year factory warranty. If you are not satisfied with the Onspot system, there is also a 6-month repurchase guarantee.

2 YEARS
FACTORY WARRANTY
6 MONTHS
MONEY BACK GUARANTEE

One solution - many benefits

- Traction similar to conventional snow chains – by pressing a button!
- Permanently installed – always on hand when you need them
- Engage/disengage while driving up to 35 mph
- Works forward and in reverse
- Reduces braking distance
- Increased safety and comfort for the driver
- Virtually maintenance-free
- Reduced risk of costly downtime when roads are icy

...YOU'LL MAKE IT IN TIME
